EDUCATION

Northeastern University

Boston, MA

Candidate for B.S. in Computer Science and Design, Minor in Computational Data Analytics September 2023 – April 2027

GPA: 3.9/4.0

TECHNICAL SKILLS

Skills: Design Systems, Component Libraries, UXR, Wireframing, Prototyping, Journey Mapping, Software Development, Data Visualization, Accessibility

Tools: Figma, Claude Code, Claude Design, Figma Make, Adobe Suite (Photoshop, Illustrator, InDesign), Jira, Linear

Development: JavaScript, TypeScript, Java, React, Python, SQL, Amazon Web Services, Azure

WORK EXPERIENCE

Product Design Co-op

January 2026 – June 2026

Klaviyo

Boston, MA

- Resolved systemic UX debt in content organization by proposing to decouple metadata from structural hierarchy, designing a Folder system with four net-new components and aligning senior stakeholders to fundamentally shift the platform's mental model.
- Standardized 6 disparate custom carousels into a single canonical component by owning the complete design-to-code implementation, navigating engineering review to successfully contribute to the component library.
- Deployed a Claude Code prototyping pipeline utilizing the Figma Model Context Protocol (MCP) and custom AI skills to automatically scaffold React code from design links, eliminating the barrier for non-technical designers and earning executive recognition.
- Shipped two Figma-to-code plugins to Klaviyo's internal Claude Marketplace and built a VS Code audit extension that maps affected pages across a 98+ package monorepo, replacing a multi-hour manual pre-release review.
- Contributed 166 commits (+22,299 net lines) across 4 repositories, shipping production UI, performance refactors, and WCAG AA accessibility specs alongside design deliverables.

Software Engineer Co-op

January 2025 – July 2025

Verizon x NExT

Boston, MA

- Designed a data-ingestion platform to analyze and visualize publicly available customer sentiment data to inform customer retention strategy, conducting bi-weekly user research sessions with Verizon's AI&D Team to inform design decisions for a platform addressing \$150M+ in annual churn-related revenue loss.
- Led a team of 6 software engineers using Agile and product-management methodologies to define complex project requirements, ensuring on-time and on-track project completion while increasing ticket completion by 98%.
- Spearheaded design operations, building 50+ responsive components using Verizon Design System, ensuring platform consistency within the Verizon application ecosystem while meeting accessibility standards.

RELEVANT EXPERIENCE

Director of Design

January 2026 – Present

Code4Community

Boston, MA

- Led the Design pillar for a 70+ member student organization, across 6 concurrent nonprofit client projects, overseeing deliverables, timelines, and client needs while providing design direction, critique, and hands-on support to ensure projects stay on track.
- Established organization-wide standards for design systems and reusable component libraries, reducing design-to-development handoff overhead and creating more consistent, scalable product experiences across projects.
- Organized and facilitated design education and community programming, including career development and skill-based workshops for 50+ attendees, and community events in collaboration with Figma.
